**DETAILED ACTION**  
***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to cheese and cocoa fat-based composition, classified in class 426, subclass 585.
- II. Claims 8-12, drawn to method of making a coating/filling product containing cheese, cocoa fat and milk powder, classified in class 426, subclass 442.

Inventions of Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process claimed in Group II (claims 8-12) could be used to make any molded food product containing cocoa butter and/or cheese any other creamy fat based composition, such as, molded low fat cheeses and products comprising fudge or milk chocolate etc.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search and/ or the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
